Duration: 29 March 2016- 16 May 2019

Total budget: BGN 27 886 800, 63

SUMMARY:

Based on a scholarship system, the project promotes the training in particular fields of higher education that are determined as priority ones in the country, extends the coverage of training services by additional resource, allowing the education to be more accessible. The training of students in the priority fields of economy, as well as in the priority areas and policies of the European Social Fund (qualifications where there is a lack of staff and applicant students) is stimulated by providing student scholarships for advancement. The scholarship funding for excellence in science, engineering, pedagogical science, innovations and entrepreneurship, arts, culture and sports encourages the students to develop their practical and creative potential beyond the curriculum requirements.

ACHIEVED RESULTS:

A total of 41 501 students received scholarships under the project, of which 32 102 (unique PINs) students received scholarship for advancement and 9 399 (unique PINs) obtained scholarships for special excellence. Four campaigns related to the project application were carried out (four semesters – one in winter of the academic year 2015/2016, winter and summer of the academic year 2016/2017 and winter of the academic year 2017/2018). A sociological survey is conducted among students and team members related to the project implementation in the universities.
